Space

Do you know what this place is?

It's space!

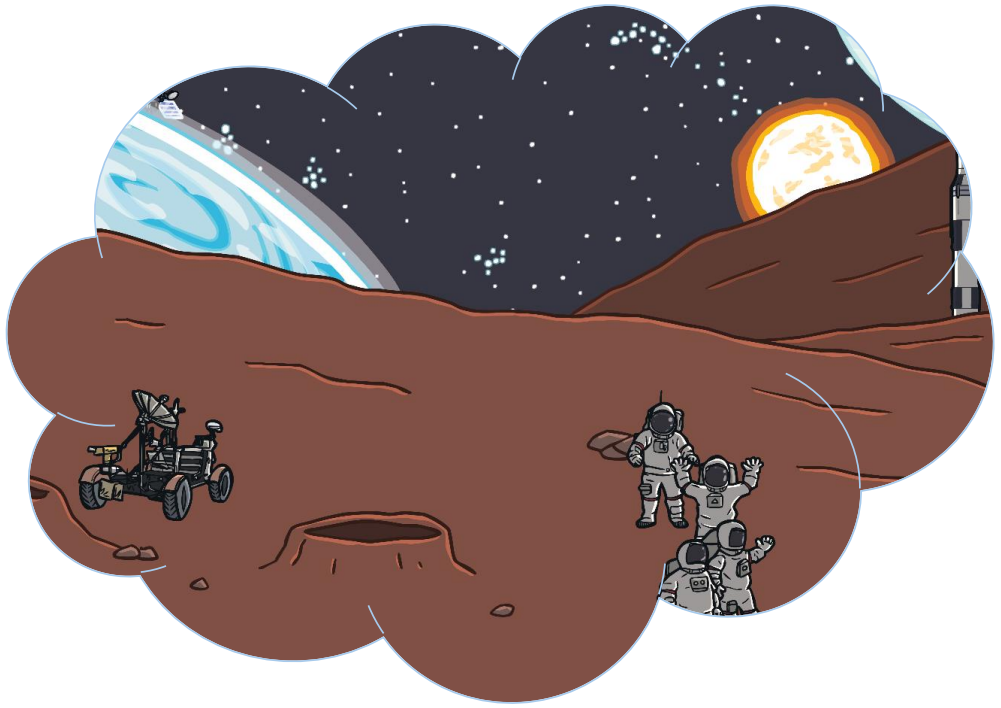

Today, we are going on an amazing adventure in space! We will learn about this distant and exciting place.

Space

Space is a place far away from Earth! Imagine a place full of stars, planets and wonderful things. It is a beautiful place!

What can we find in space?

Stars

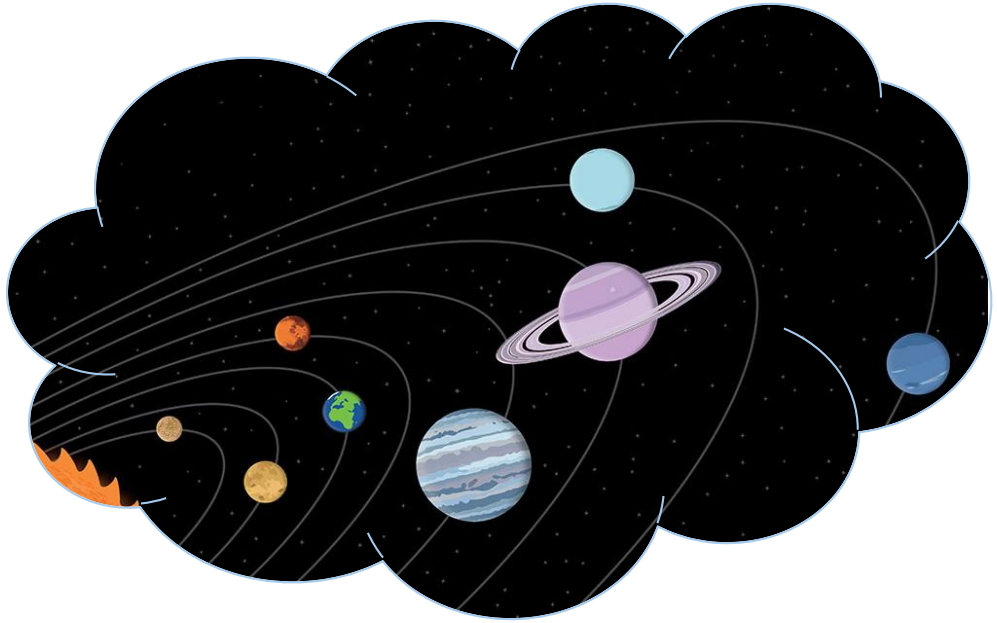

Space is full of shining stars. Have you seen a bright star in the night sky? It is one of the many stars in space.

What can we find in space?

Planets

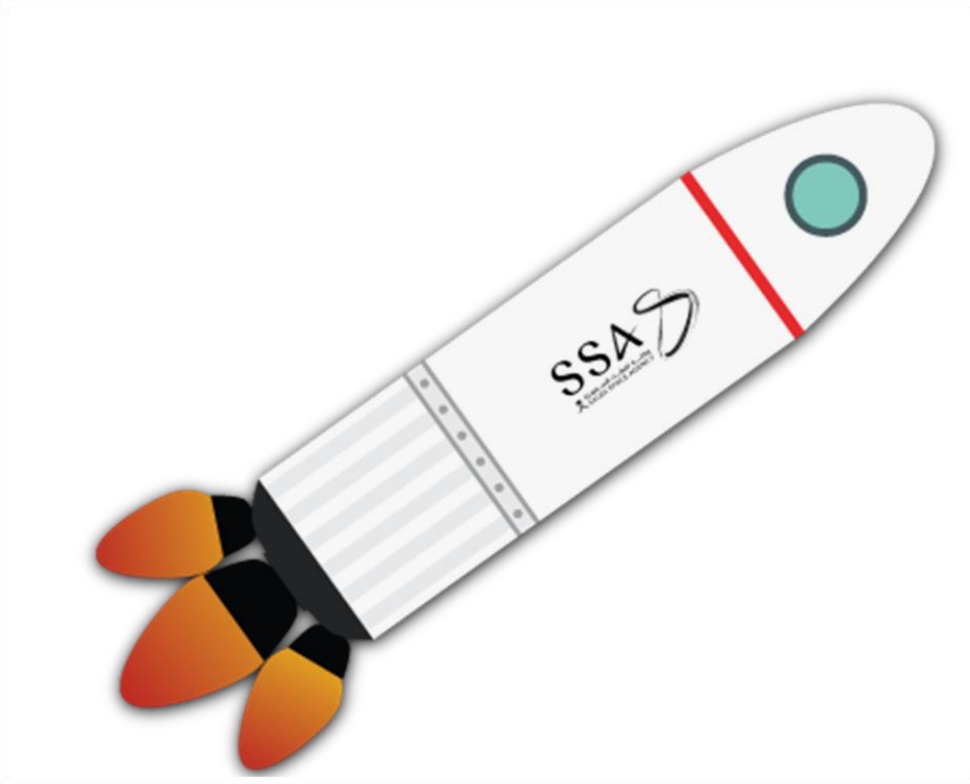

There are planets in space, including Earth, the planet we live on. Do you know how many planets orbit the Sun? There are eight planets in our Solar System!

What can we find in space?

Spacecraft

There are spacecraft in space, too. They help scientists explore space and understand it better.

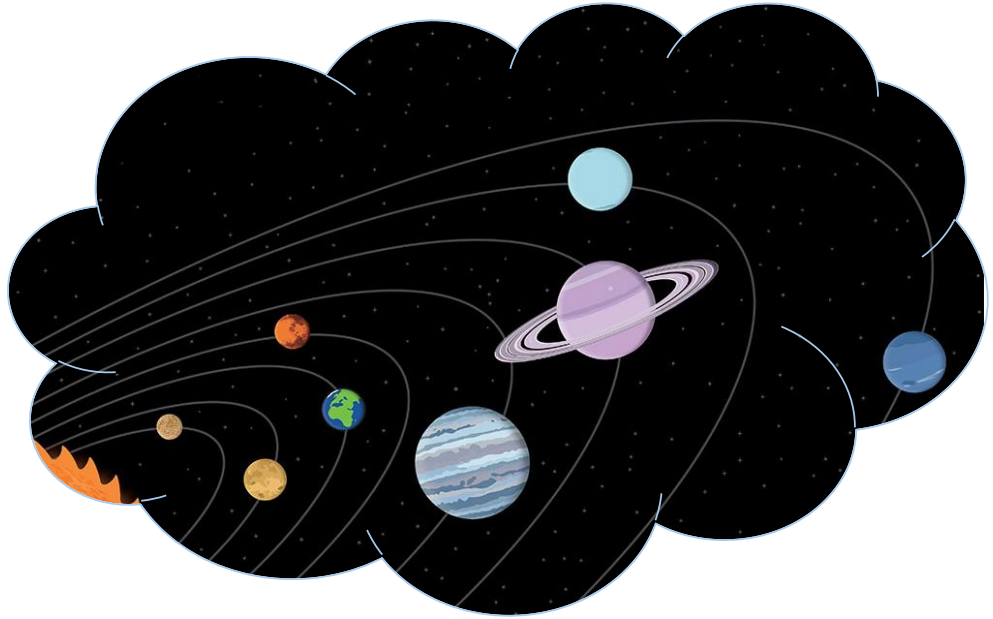

What can we find in space?

Comets

There are comets in space, too. Comets are small objects made of ice, dust and rock that orbit the Sun.

Space is no ordinary place. It is full of amazing colors and sparkling lights. You can see many different stars and planets. Planets can be small or large, and each has its own color and shape.

Space can be very cold, and very hot near the Sun. Astronauts wear special spacesuits to protect themselves.

Space is an amazing and exciting place!

It is full of colors and mysteries.
You could have many adventures in space when you grow up.
Do you dream of becoming an astronaut one day?
